## Objective

I am a Computer Science Undergraduate at Bina Nusantara University with experience in frontend and software development, UI/UX design, graphic design through academic projects and professional experiences. Throughout my studies, I have built a website for machine learning and software engineering in program using Python, also utilizing my skills in Java, HTML, CSS, and JavaScript while continuously expending using my knowledge in web development and digital product design. So I am focusing deeply on artificial intelligence while improving my creativity with contributing to meaningful projects as a responsible and adaptable team member.

## Skills

I have practical experience working with python, Java, JavaScript, HTML, and CSS through academic coursework and personal projects. I am familiar with Git, GitHub, Streamlit, Visual Studio Code, and Figma for software development, version control, and UI/UX design. Beyond technical skill, my involvement in leadership, event management in my organization, and customer facing roles has strengthened my communication, adaptability and attention to detail. I am a dedicated learner who values collaboration, welcome feedback, and enjoys turning ideas into practical and user-centered digital solutions.

## Education

- High School Diploma in Natural Sciences (IPA)** 2022 – 2024  
*SMA Charitas Jakarta*  
Studied the Natural Sciences (IPA) Curriculum, developing analytical thinking with logical problem-solving skills and quantitative skills that prepared me for computer science studies.
- Bachelor of Computer Science** 2024 – 2028  
*Bina Nusantara University*  
Building a strong foundation in software engineering, database systems, and currently specializing in artificial intelligence through hands on academic projects and collaborative learning with coursework in machine learning, computer vision, data analytics, and intelligent systems.

## Experience
